1.Introduction:

Project overview:

Creating a personal blog on IBM Cloud Static Web Apps offers a platform for sharing my passions, insights, and experiences with the world. Through this digital canvas, I aim to connect with a diverse audience, providing valuable content spanning a range of topics. Here also create a story series to builds on previous one!!

Purpose and scope:

Purpose:

The primary purpose of the personal blog is to create a user-friendly and sharing travel experience. This platform will:

- **Content Sharing**: The primary purpose of a personal blog is to share your thoughts, experiences, and expertise on specific topics of interest with a wider audience.

- **Professional Branding**: It serves as a platform to establish and showcase your expertise in a particular field enhancing your professional image and credibility.

Scope:

- **Content Types**: Consider the types of content you'll create. This might include articles, tutorials, reviews, personal anecdotes, or a combination of different formats.
- **Interactivity**: Define the level of interaction you want with your readers. Will you enable comments, social sharing.
- **Target Audience**: Determine who your blog is intended for. Are you writing for professionals, hobbyists, enthusiasts, or a general audience? Tailor your content to meet their needs and interests.

Unique part:

- **Story Series**: Create serialized content where each post builds on the previous one, keeping readers coming back for more.
- **Collaborative Projects:** Partner with other bloggers or content creators to work on collaborative projects, such as eBooks, podcasts, or joint blog series.
- **Live Interaction**: Host live streaming sessions or webinars.

Audience:

- **Community or Followers:** If you have an existing online community or social media following, they are likely to be a part of your blog's audience since they already have an interest in your content.
- **Industry Professionals**: If your blog focuses on a specific industry or professional niche, your audience may consist of fellow experts, colleagues, or professionals seeking insights and updates.
- **Enthusiasts**: Blogs centred around hobbies, interests, or niche passions often attract enthusiasts who share your love for a particular subject, such as travel, photography, or cooking.

2. Platform Definition:

Features and Functionality:

The personal blog offers a range of features and functionalities to create an immersive and user-friendly travel sharing experience:

- **Content Management**: Use static site generators like Jekyll, Hugo, or Gatsby to create and organize your blog posts efficiently.
- **Responsive Design**: Ensure your blog is mobile-friendly and adapts to different screen sizes and devices.
- **Social Media Sharing**: Enable social sharing buttons to make it easy for readers to share your content on their social networks.
- **Content Sharing Widgets**: Display widgets that showcase popular or related posts to keep readers engaged.

User Registration:

User registration is a fundamental component of personal blog:

- **User Registration Form**: create a user registration form on a dedicate registration page of a blog.
- **User Profiles**: Create user profiles that users can customize with avatars, bios, and other personal information. Allow users to update their profiles after registration.
- **User Dashboard:** Create a user dashboard where registered users can manage their account settings, profile, and preferences.
